SAFETY TRAINING CONTRACTORS

(Chemical industry)

DEFINE THE QUESTION

Transferring safety rules and adequate safety behavior to external contractors working in multiple sites of a chemical company. Time constrictions and multiple languages must be taken into account.

Deliverables:

Analysis, proposal of the approach

DESIGN THE ANSWER

One e-Learning encompassing a general safety introduction followed by site specific regulation and instruction. Understanding is tested by certifying on-line assessments. Main approaches: structured information, taking into account prior knowledge, learn from feedback, information on a need-to-know basis and visualization. Client has no LMS. A solution for a certificate is needed.

Deliverables:

High level storyboard,

DEVELOP THE COMPONENTS

One e-Learning containing 11 potentially dangerous situations. Finishing all scenario's will lead the learner to an end assessment.

Deliverables:

E-Learning modules development in Articulate Storyline 360.

DEPLOY THE SOLUTION

Deliverables:

Roll-out in 8 different languages.

End assessment,
Safety desk can pick up this information and provide entrance badges.

- ✓ Priority Support
- ✓ Commercial and Re-sell Rights

WAAR OP LETTEN?

Modality Principle

Cursisten leren **beter** van **animatie en beschrijvende audio** dan van animatie en onscreen tekst.

Redundancy

Hou het bij korte teksten.

Contiguïteit

Stem tekst en animatie op elkaar af.

COGNITIVE LOAD!
