(of toch met jullie leerplatformen)

ENGAGEMENT

lets met de bomen en het bos?

Learning eXperience Platform
ofte

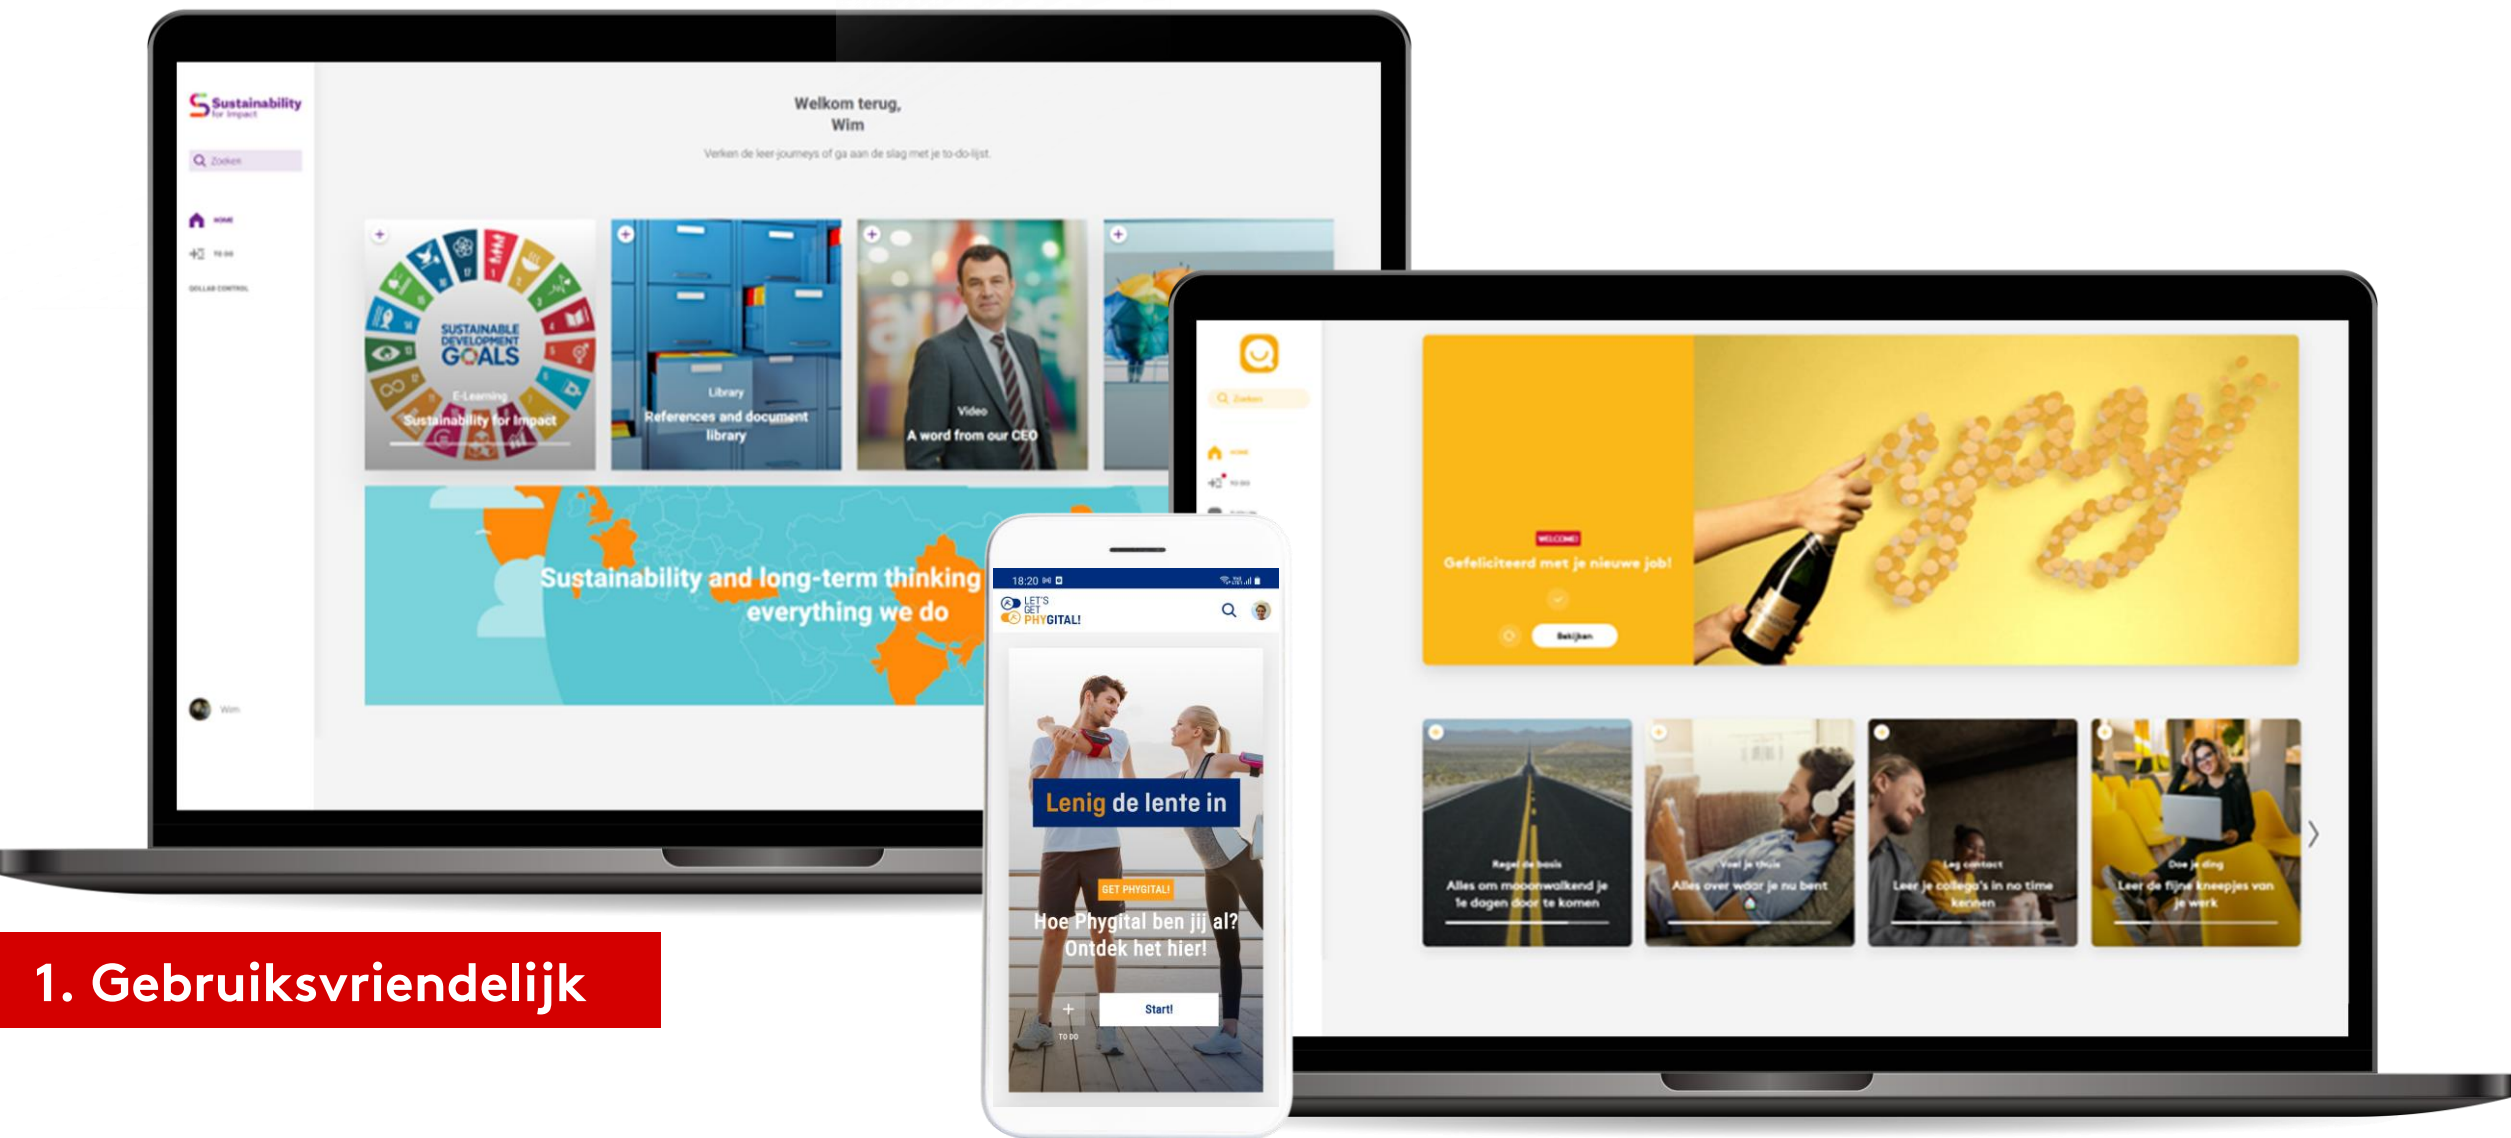

LXP

En hoe dan, meneer?

6 manieren hoe een LXP helpt bij het engagement van je medewerkers

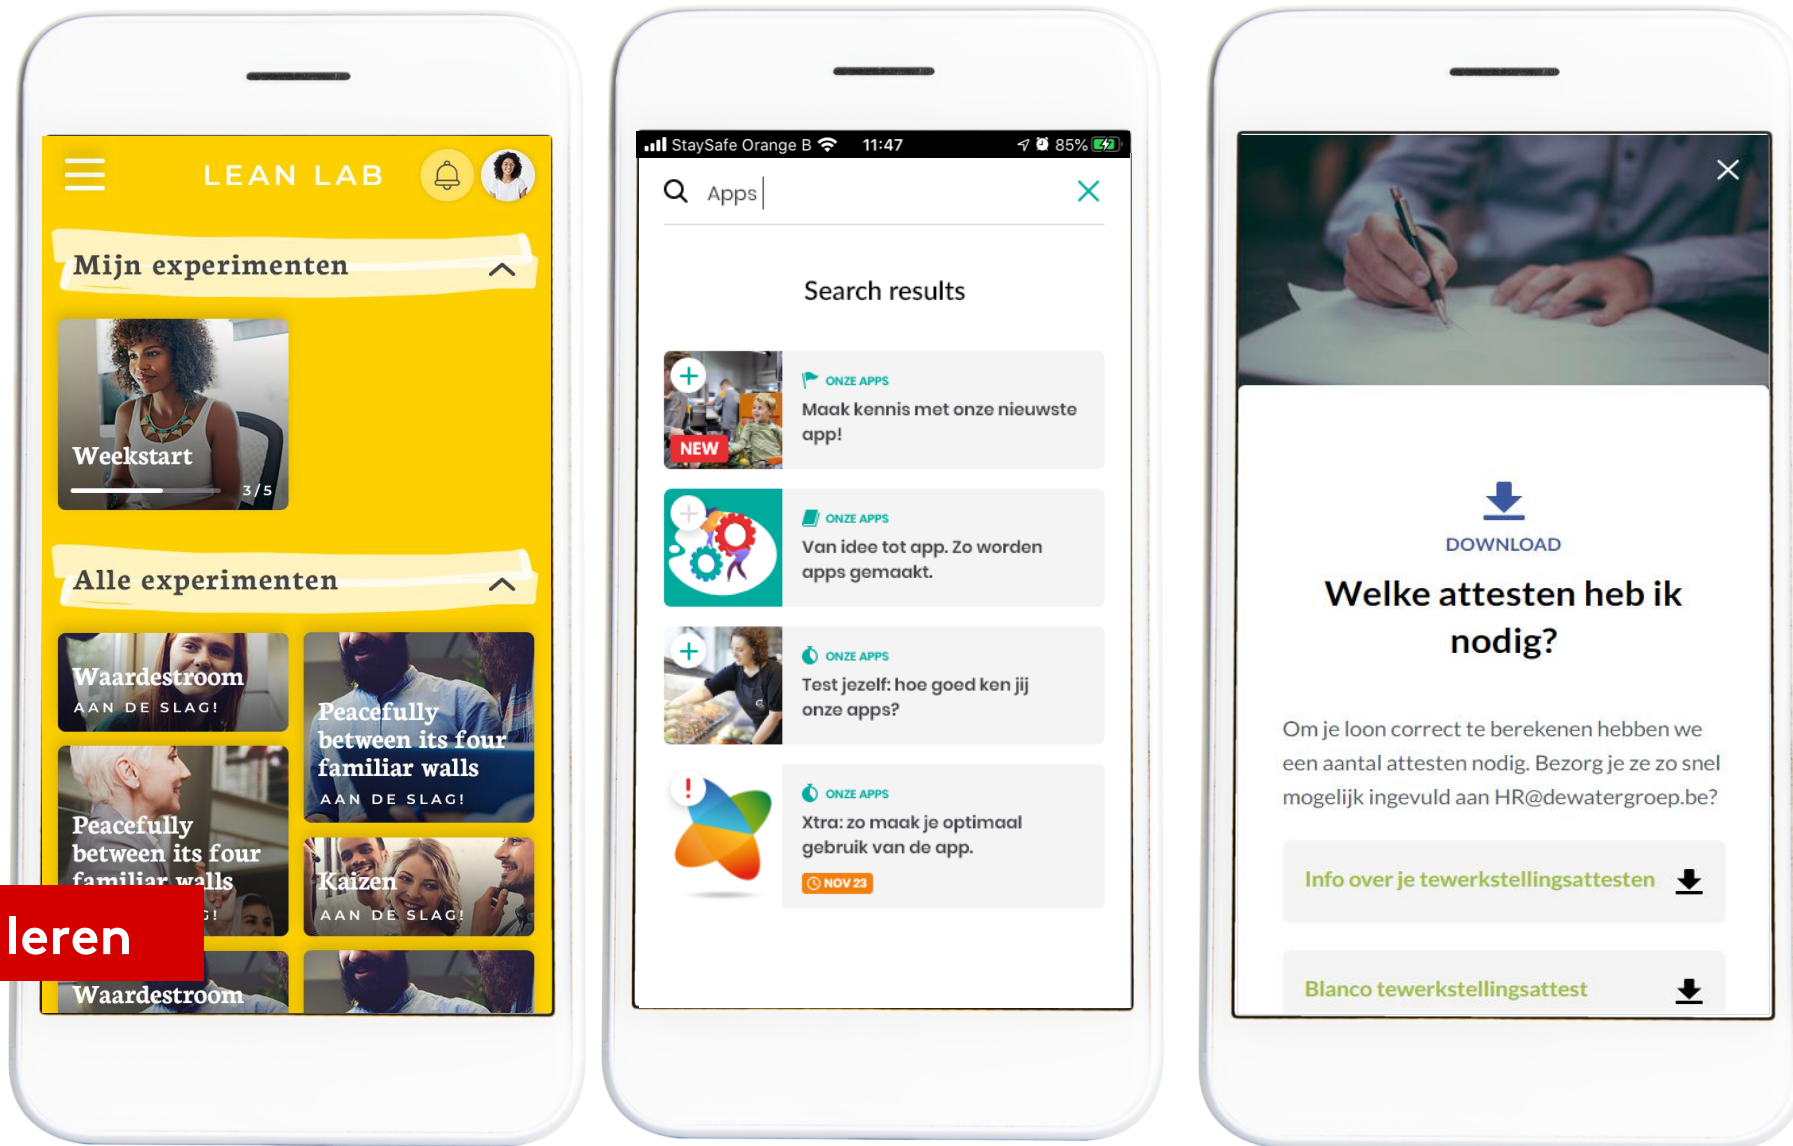

Enkel happy faces

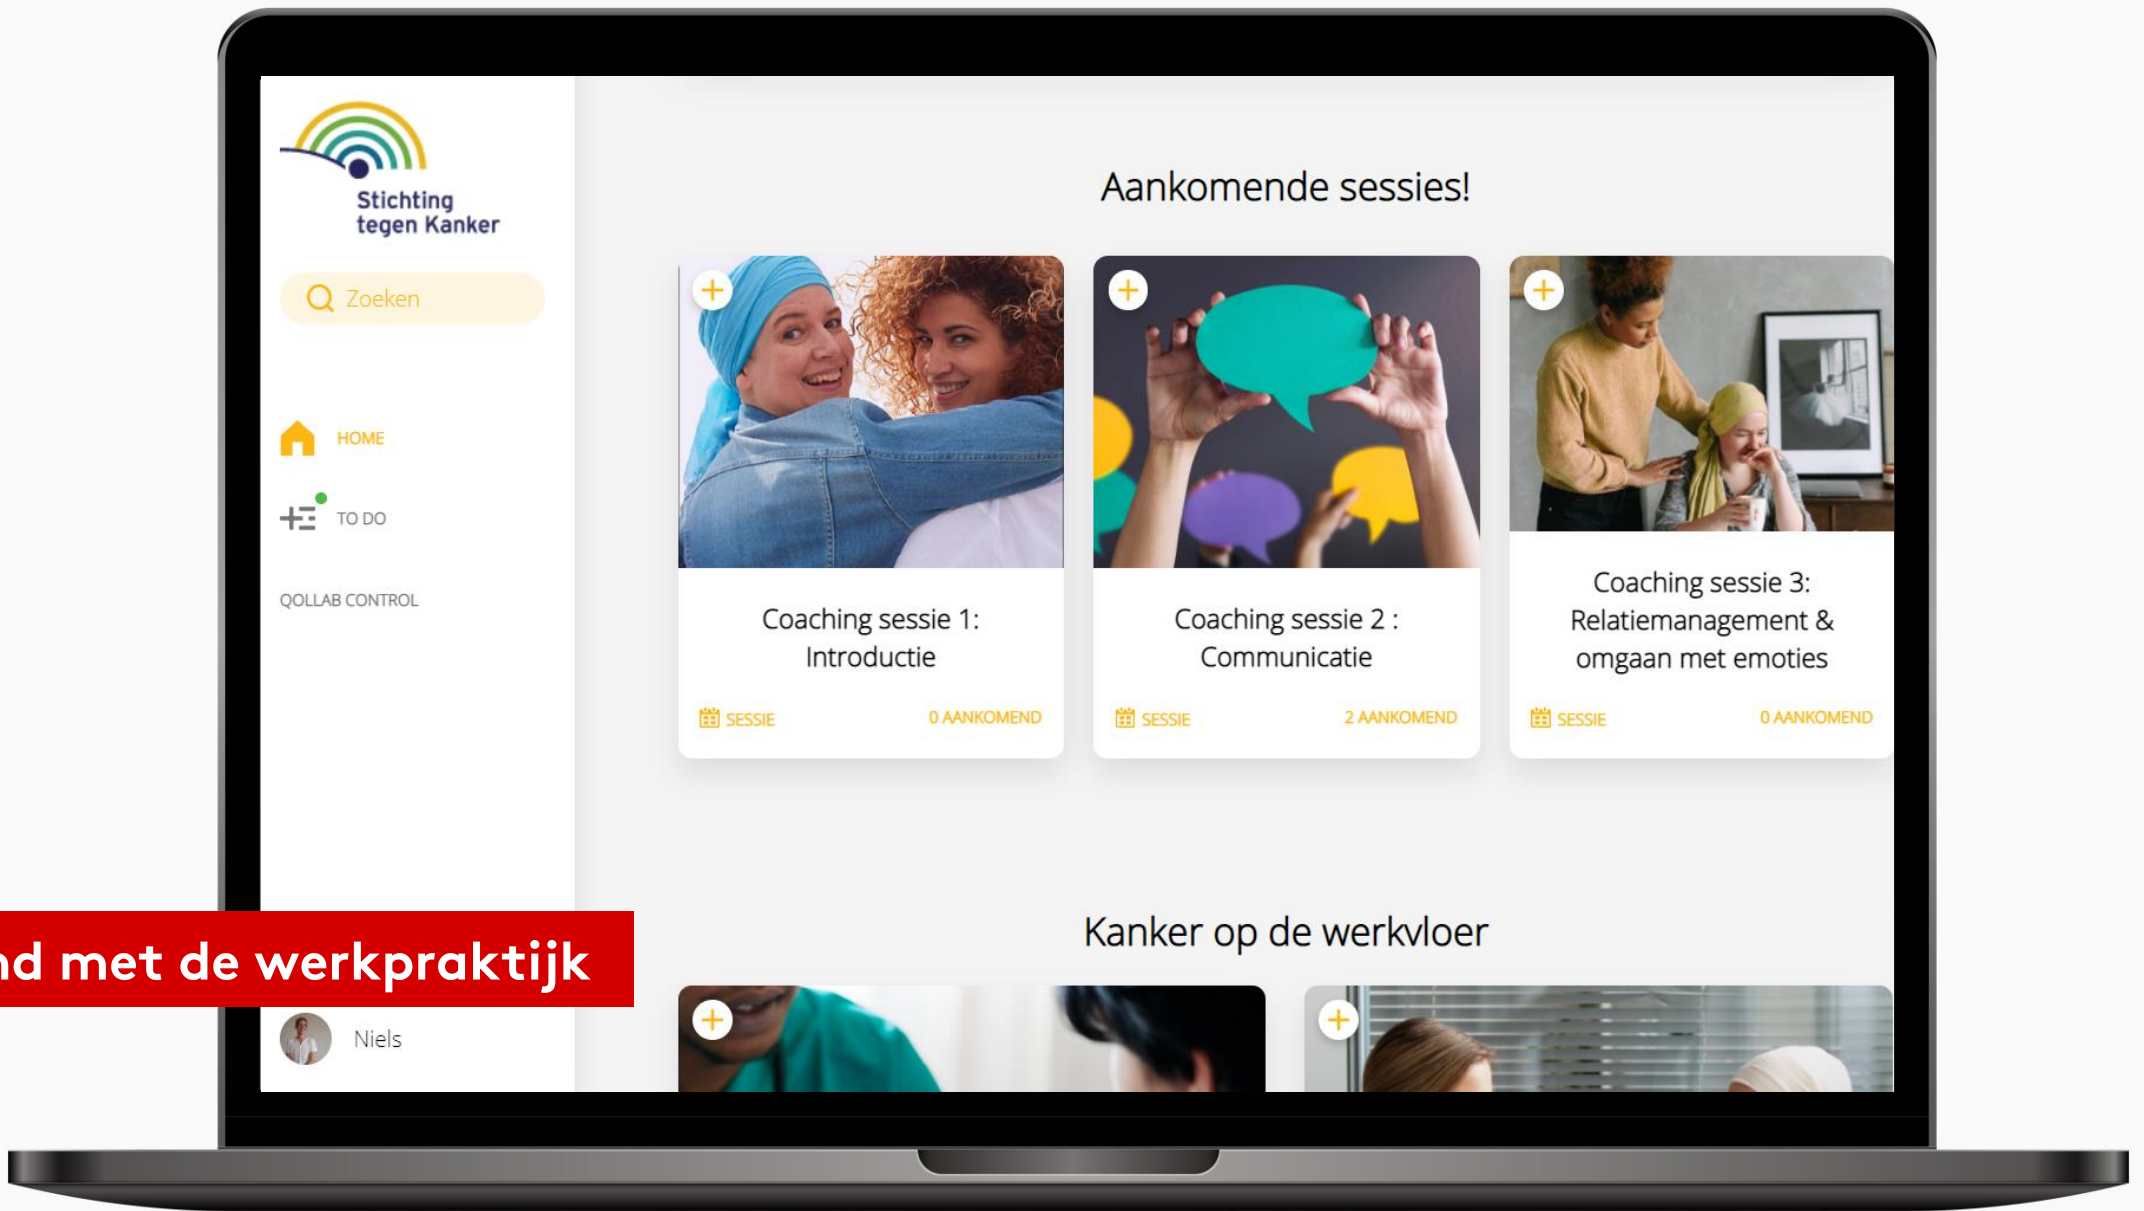

1. Gebruiksvriendelijk

Intuïtief, grafisch aangenaam, ook mobiel beschikbaar

2. Persoonlijk leren

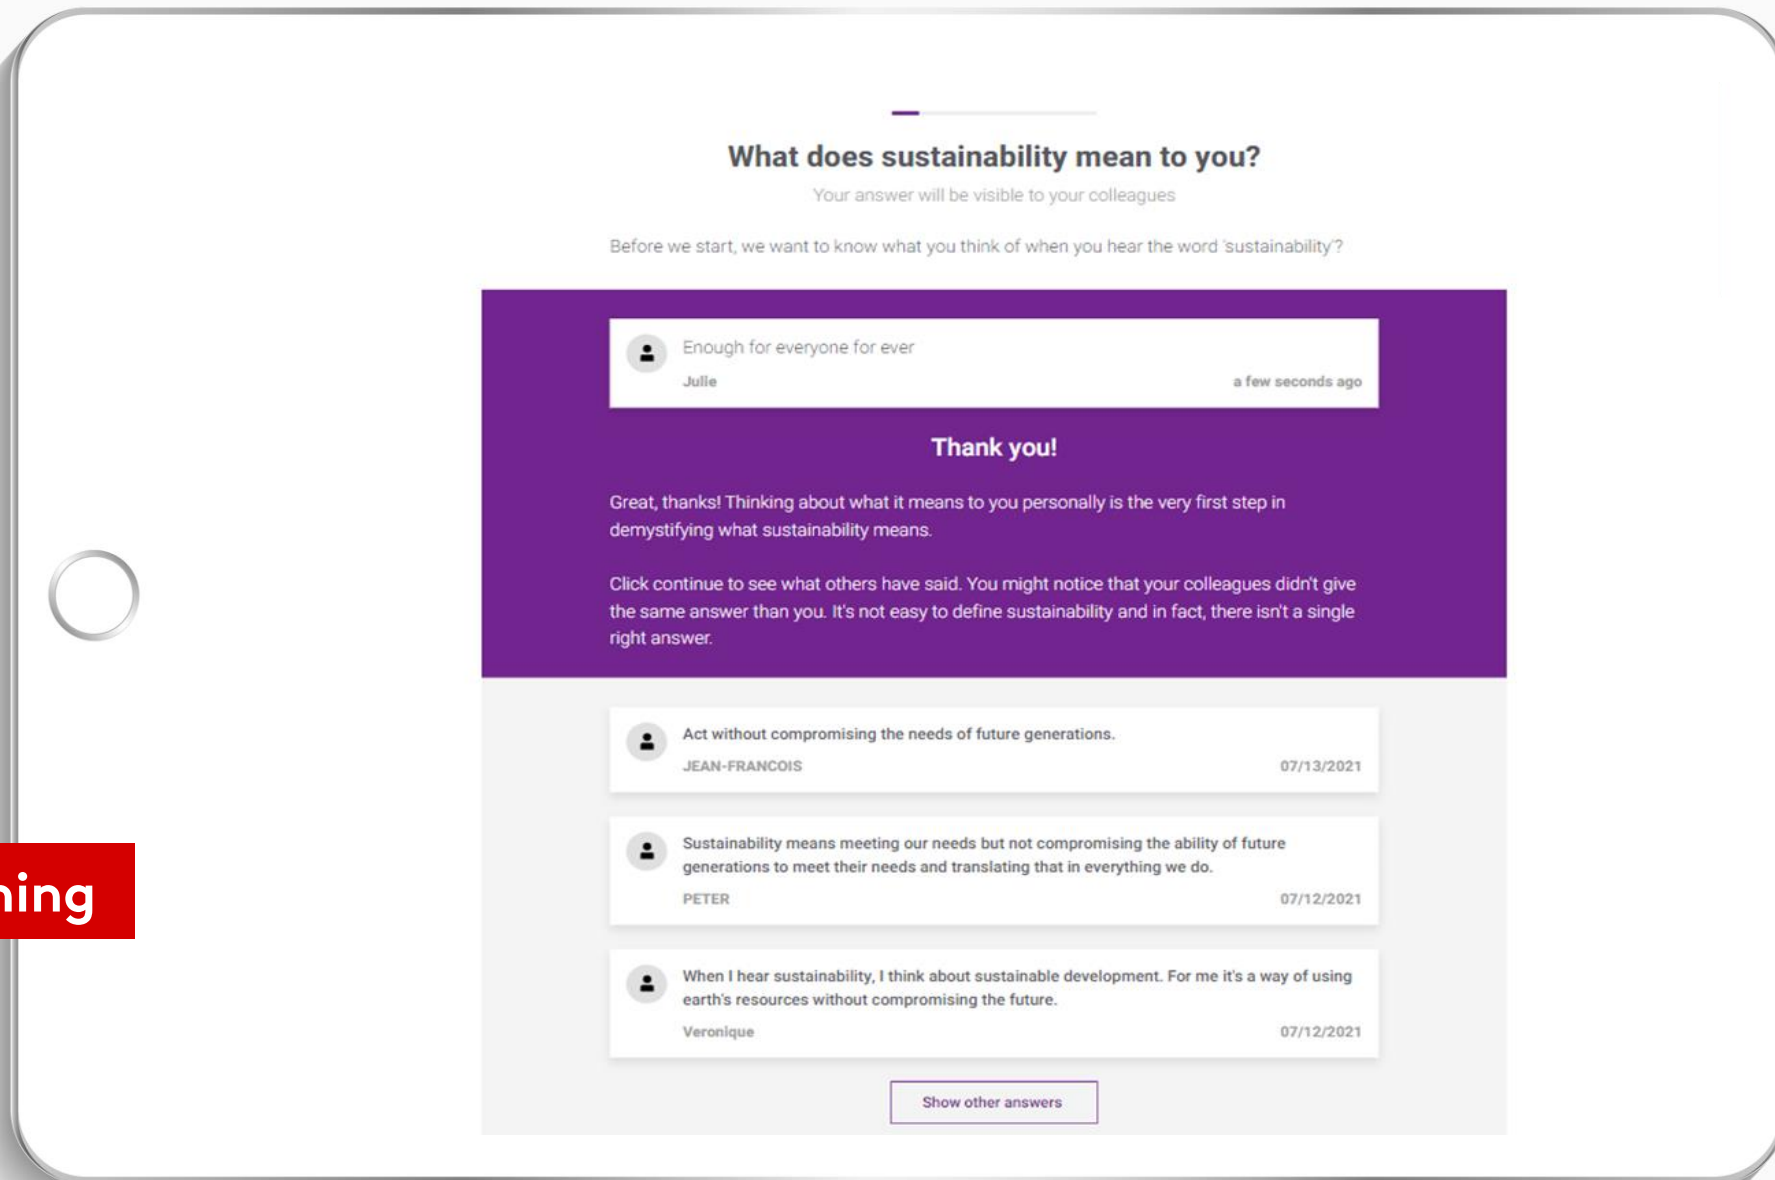

Inhoudelijke differentiatie, relevant, opbouwend & verdiepend, actueel

To do's, opdrachten & online sessies

4. Social learning

The screenshot shows a tablet interface for a social learning activity. At the top, a question asks 'What does sustainability mean to you?' with a note that answers are visible to colleagues. Below this, a prompt asks for thoughts on the word 'sustainability'. A purple box highlights a recent response from Julie: 'Enough for everyone for ever', posted 'a few seconds ago'. Below the purple box, a 'Thank you!' message is displayed, followed by a paragraph explaining that this is the first step in demystifying sustainability. It then encourages the user to click 'continue' to see others' answers, noting that colleagues' answers may differ and that there is no single right answer. Below this, three other responses are listed: Jean-Francois (07/13/2021) with 'Act without compromising the needs of future generations.', Peter (07/12/2021) with 'Sustainability means meeting our needs but not compromising the ability of future generations to meet their needs and translating that in everything we do.', and Veronique (07/12/2021) with 'When I hear sustainability, I think about sustainable development. For me it's a way of using earth's resources without compromising the future.' A 'Show other answers' button is at the bottom.

What does sustainability mean to you?
Your answer will be visible to your colleagues

Before we start, we want to know what you think of when you hear the word 'sustainability'?

 Enough for everyone for ever
Julie a few seconds ago

Thank you!

Great, thanks! Thinking about what it means to you personally is the very first step in demystifying what sustainability means.

Click continue to see what others have said. You might notice that your colleagues didn't give the same answer than you. It's not easy to define sustainability and in fact, there isn't a single right answer.

 Act without compromising the needs of future generations.
JEAN-FRANCOIS 07/13/2021

 Sustainability means meeting our needs but not compromising the ability of future generations to meet their needs and translating that in everything we do.
PETER 07/12/2021

 When I hear sustainability, I think about sustainable development. For me it's a way of using earth's resources without compromising the future.
Veronique 07/12/2021
