

An introduction to dScribe Guide

Turn “I’ll have to ask” into “I’ve got this.”

Accelerate growth by enabling faster creation and sharing of user manuals

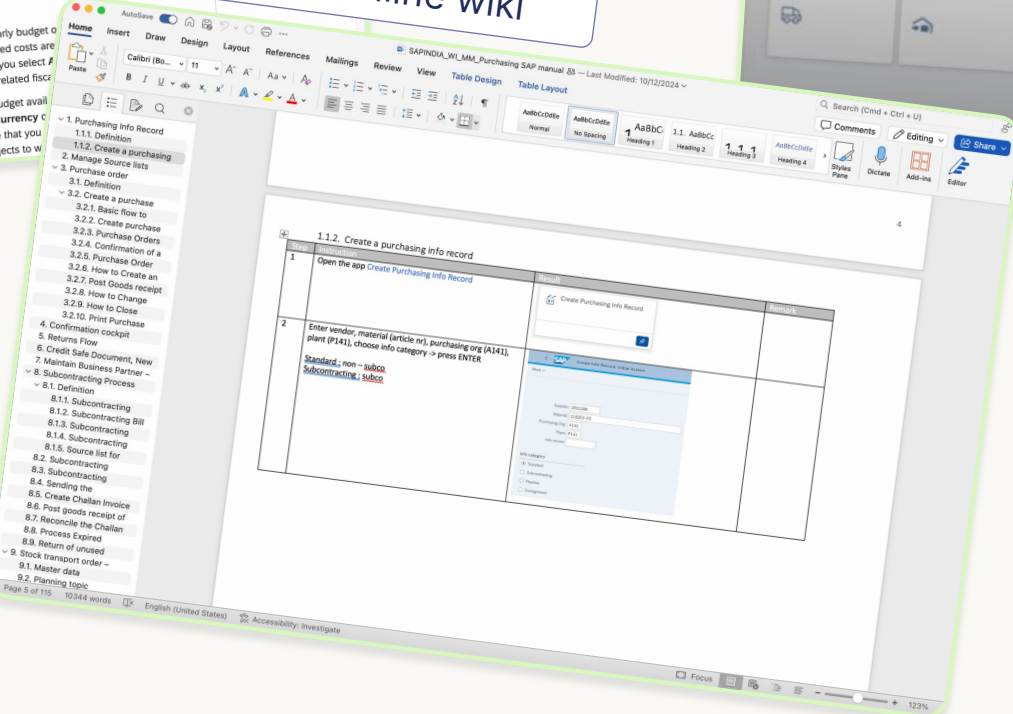

dscribe.cloud/guide

User guides can get messy

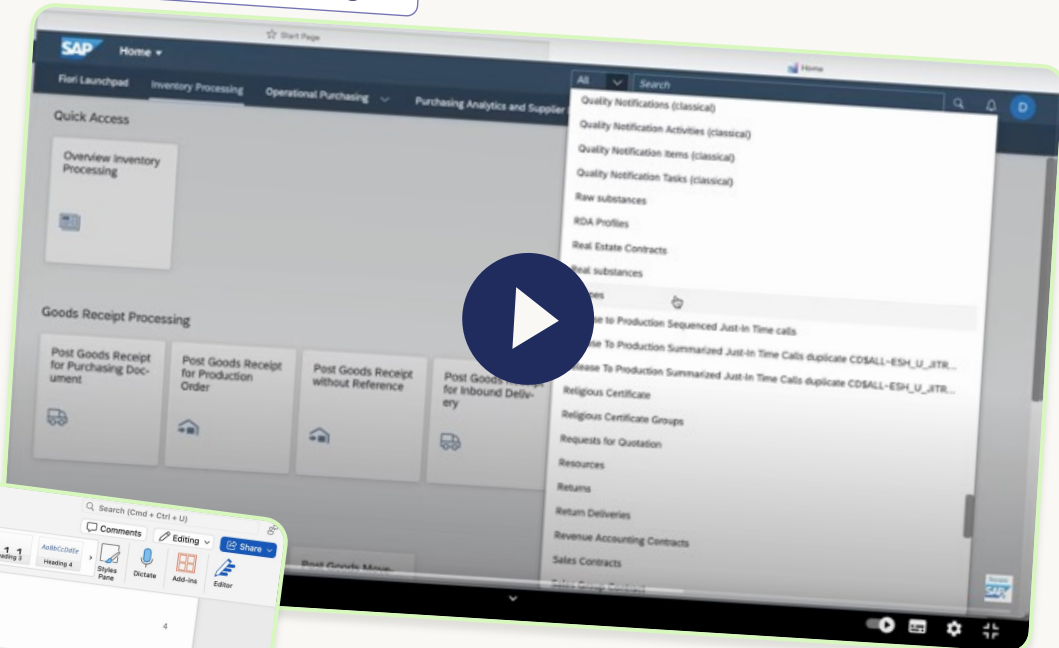

Standard software documentation

Word, PPT or online wiki

Screen recordings

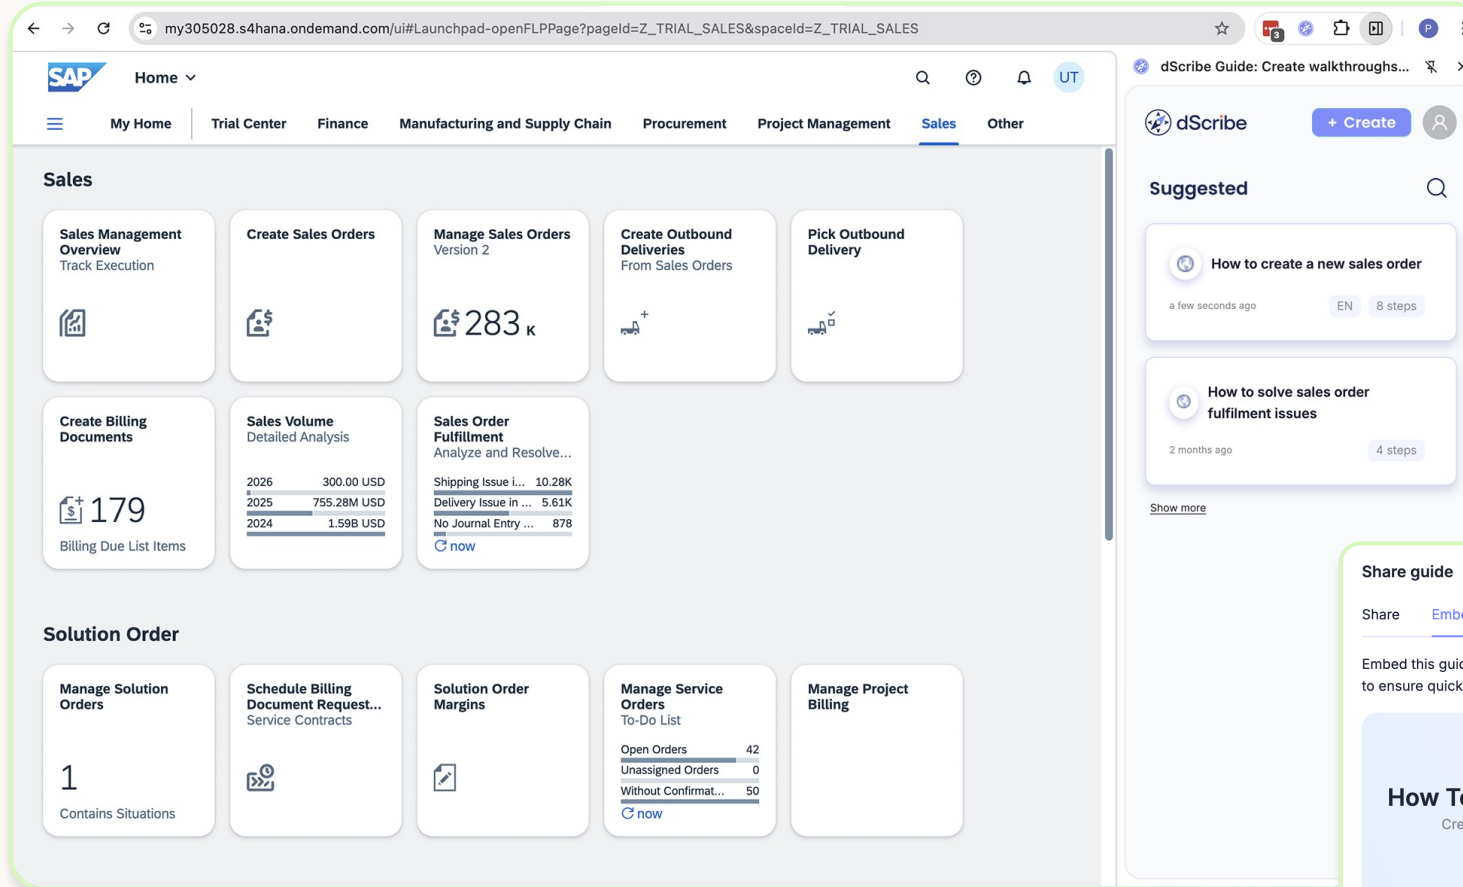

Your team deserves better than Ctrl+PrtScn.
Capture know-how once. Free up your team forever.

- ✓ **Stop wasting time with screenshots** – Generate guides 15x faster
- ✓ **Create professional guides consistently** – Get an all-in-one tool for capturing, annotating and sharing
- ✓ **Support teams globally** – Use AI translation for users across the globe
- ✓ **Get proof your documentation works** – Analyze usage & user feedback

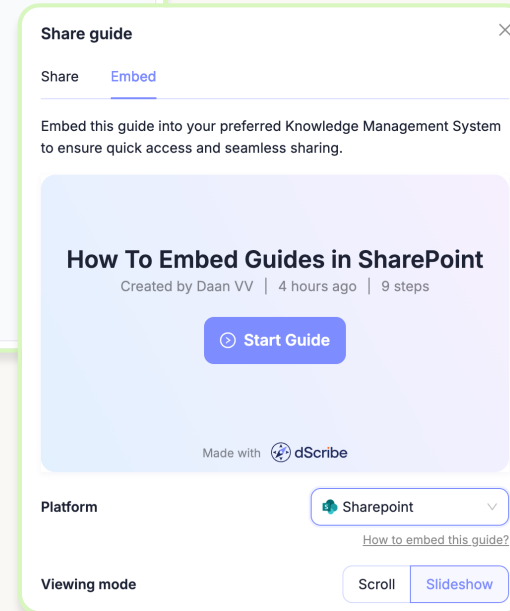

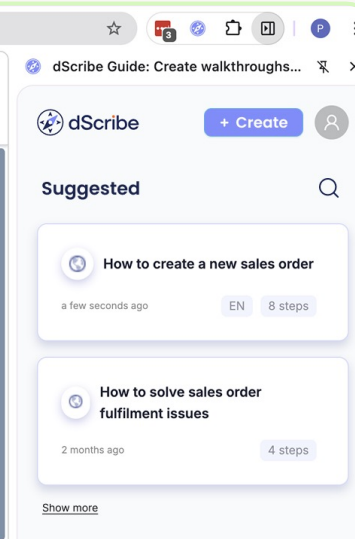

The image displays a 'My Timesheet' application interface. The main area shows a calendar for the week of Feb 17, 2025, to Feb 23, 2025 (CW 8). The 'My Tasks' list on the right includes 'Miscellaneous' (18:00 Hours), 'Administration Tasks' (09:00 Hours, highlighted with an orange border), 'Training' (00:00 Hours), and 'Travel Times' (00:00 Hours). A dScribe walkthrough overlay is visible on the right side, titled 'dScribe Guide: Create walkthroughs...'. It shows a guide titled 'How to register your timesheets' with two steps: '1. Click on Manage My Timesheet' and '2. Click on Administration Tasks'. The overlay also includes a 'Pause' button, a 'Cancel' button, and a 'Finish' button.

Documentation that finds users (not the other way around)

Finally, help that doesn't play hide and seek

- ✓ **Fewer "How do I...?" interruptions** – Context-specific help exactly when and where users need it
- ✓ **Reach users where they work** – Share on-screen or in your existing knowledge systems
- ✓ **Turn confused users into confident ones** – Proper guidance leads to better adoption and productivity gains

Popular use cases:

Testimonials

"Writing and keeping user guidance up to date is way more easy with dScribe, and also the information is easy to find."

Raimundo Costa, BI analyst

- "dScribe is something you should always have working alongside with Power BI."
- "dScribe is like having a dedicated assistant for report & data knowledge."
- "With dScribe, we've created a thorough overview of all the available reports. This is rapidly becoming the starting point for handling any new data-related questions in our organization."

**Faster manuals. Smarter
teams.**
